

## CLC Quality Characteristic

### What is it?

CLC stands for Company Ledger Certificates. Only companies that meet certain criteria and have a certain legal structure that complies with Dutch law obtain admission.

**Uniformity.** CompanyLedger has chosen a standard legal format for the sake of saving cost, enhancing flexibility and to prevent misunderstandings. CompanyLedger refers you to a recognized and specialized notary for organizational (re-)structuring. It is of importance to know that CompanyLedger does not receive any financial compensation from this notary. Therewith, the independence of the notary's advice is safeguarded.

**Legal conformity.** The interests of the investors are determined based on Dutch Law and the underlying structure is recorded in notarial acts.

**Escrow compliance.** This warrants that no unauthorized issuance of certificates takes place.

A listing that has a CLC Quality Characteristic looks like this:

**CLC.YOURCOMPANY**
